Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/824,441	Applicant(s) FUJII ET AL.	
	Examiner Harry A. Grosso	Art Unit 3781	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-4 in the reply filed on April 12, 2007 is acknowledged.
2. Claims 5-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujii et al (WO 02/18232., March 7, 2002, as presented in equivalent U.S. Patent 6,648,168) (Fujii) in view of Burger (918,503).
5. Regarding claim 1, Fujii discloses a vacuum insulating double wall vessel with films that can be applied to both the outer surface of the inner vessel and the inner

surface of the outer vessel (Figure 1, column 3, lines 16-17; lines 39-47 and lines 61-66 of the U.S. Patent) with a film unapplied portion in the vessel height direction (7).

6. Fujii does not teach a plurality of opening vestiges on the outer vessel. Burger discloses a vacuum insulating double wall vessel with a plurality of vestiges resulting from sealing of a plurality of openings used for injecting and discharging chemical solutions and evacuating a space between the inner and outer vessels (H, I, Figure 6, page 1, lines 70-82). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a plurality of openings that results in a plurality of vestiges on the outer vessel as disclosed by Burger in the vessel disclosed by Fujii to provide plural openings used for injecting and discharging chemical solutions and evacuating a space between the inner and outer vessels to perform the tasks more efficiently.

7. Regarding claim 2, Fujii discloses the vessel material is glass (column 3, lines 16-17).

8. Regarding claim 3, Fujii as modified by Burger discloses tip tubes used for the openings (H, I, Figures 3 and 4 of Burger).

9. Regarding claim 4, Fujii as modified by Burger has openings provided at opposite positions on the outer periphery of the bottom of the outer vessel (Figures 3 and 4 of Burger).
